-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-11, & 13-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson 4,248,346 (newly cited).

Johnson shows a container for a wafer, including a box 10 for containing the wafer, which may be enclosed in a bag (not shown), and nitrogen may be contained in the box and bag (column 2, lines 28-37; column 2, line 67 to column 3, line 8; column 6, lines 17-21).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains.

Patentability shall not be negatived by the manner in which the invention was made.

Claims 5-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson in view of Brooks 6,003,674.

Johnson shows the wafer container including a shipping box and packaging bag filled with nitrogen, but it is not clear if there is a hole in the box to allow the box and bag to communicate. One would recognize that a hole in the box would be desirable to enable the nitrogen to fill the box and bag. For example, Brooks shows that a wafer box may have a hole 78 to allow gas to be filled in the box and surrounding bag B. It would be obvious to include this hole in the box of Johnson.
